

PATENT**PLASTIC WINDOW, ESPECIALLY FOR MOTOR VEHICLES, AND
PROCESS FOR ITS MANUFACTURE****Filed by: SAINT-GOBAIN VITRAGE****Inventors: Jean-Louis BRAVET
Marc MAURER****ABSTRACT**

The invention relates to a product which is at least partly transparent and of high optical quality, equivalent to that of a glass window, which can be approved as a motor-vehicle window according to the various standards in force, and having a plastic core coated with a skin comprising at least one plastic film coated with a scratch-resistant layer; it also relates to a process for manufacturing this product and to the application of the latter as a body element, part of which forms a window, for example for motor vehicles.
